

RaceDay — API Endpoint Plan

HTTP Method	Route	Description	Role Required	Request Body / Parameters	Expected Responses
POST	/api/auth/register	Create an account and validate role selection.	Public	firstName, lastName, email, password, role, phone	201; 400 validation; 409 email already registered
POST	/api/auth/login	Validate credentials and create a server-side session containing user ID and role.	Public	email, password	200; 400 invalid request; 401 invalid credentials
POST	/api/auth/logout	Revoke the current server-side session.	Authenticated	None	204; 401 not authenticated
GET	/api/auth/session	Return the current authenticated user's ID and role.	Authenticated	None	200; 401 not authenticated
GET	/api/users/me	Return the current user's profile.	Authenticated	None	200; 401 not authenticated
PUT	/api/users/me	Update the current user's permitted profile fields.	Authenticated	firstName, lastName, phone	200; 400 validation; 401
POST	/api/users/me/profile-image	Upload a participant profile image through the API to Azure Blob Storage.	Participant	multipart/form-data image	200; 400 invalid file; 401; 413 too large
GET	/api/events	List upcoming events with optional filters.	Public	Query: date, location, eventType, distance	200; 400 invalid filter
GET	/api/events/{eventId}	Return event details and available categories.	Public	None	200; 404
GET	/api/events/{eventId}/route	Return route information for event preparation.	Public	None	200; 404
GET	/api/events/{eventId}/weather	Return live/forecast weather for event preparation.	Public	None	200; 404; 502 provider failure
POST	/api/events	Create an event owned by the authenticated organizer.	Organizer	name, description, eventDate, location, distanceKm, eventType, routeUrl, routeDescription	201; 400; 401; 403
PUT	/api/events/{eventId}	Update an event owned by the authenticated organizer.	Organizer	Same event fields as POST /events	200; 400; 401; 403; 404
DELETE	/api/events/{eventId}	Delete an event owned by the authenticated organizer.	Organizer	None	204; 401; 403; 404; 409
POST	/api/events/{eventId}/banner	Upload/replace an event banner through the API into Azure Blob Storage.	Organizer	multipart/form-data image	200; 400; 401; 403; 404; 413
GET	/api/events/{eventId}/categories	List categories belonging to an event.	Public	None	200; 404
POST	/api/events/{eventId}/categories	Create an age or distance category for an organizer-owned event.	Organizer	name, categoryType, minAge, maxAge, minDistanceKm, maxDistanceKm	201; 400; 401; 403; 404; 409
PUT	/api/categories/{categoryId}	Update a category belonging to an organizer-owned event.	Organizer	Category fields	200; 400; 401; 403; 404
DELETE	/api/categories/{categoryId}	Delete a category when no enrollment depends on it.	Organizer	None	204; 401; 403; 404; 409
POST	/api/events/{eventId}/enrollments	Enroll the authenticated participant in an event using a selected category.	Participant	categoryId	201; 400; 401; 403; 404; 409
GET	/api/enrollments/me	List the authenticated participant's enrollments and statuses.	Participant	Optional status/date filters	200; 401; 403
GET	/api/events/{eventId}/enrollments	List all enrollments for an organizer-owned event.	Organizer	Optional status filter	200; 401; 403; 404
PATCH	/api/enrollments/{enrollmentId}/status	Update an enrollment status for organizer workflow.	Organizer	status	200; 400; 401; 403; 404
POST	/api/events/{eventId}/results	Capture a finish time/position for an enrolled participant and optionally publish it.	Organizer	enrollmentId, finishTime, finishPosition, isPublished	201; 400; 401; 403; 404; 409
PUT	/api/results/{resultId}	Correct an existing result and publication state.	Organizer	finishTime, finishPosition, isPublished	200; 400; 401; 403; 404
DELETE	/api/results/{resultId}	Delete an incorrect result.	Organizer	None	204; 401; 403; 404

GET	/api/results/me	Return the authenticated participant's published race history.	Participant	None	200; 401; 403
GET	/api/events/{eventId}/results	Return published event results.	Public / Organizer	None	200; 403; 404
